STANDARD | Body & Mind

body & mind

At Ideal Standard, we believe that creativity is the catalyst to continuous evolution in your bathroom. As Europe's leading brand, Ideal Standard's goal is to create a living space that is truly like you. Sustainable and exclusively following 3 main philosophies: design, functionality and innovation. Ideal Standard is the reflection of personalised well-being. Spirit and materials focused to create a universe where the body and mind are immersed in renewed pleasure day after day. Discover the new ground-breaking solutions that capture your desires.

*Ideal
Standard*

Introducing the new Ideal Standard brand logo. We are changing the look and feel of our logo, with a new soft and graceful shape, conveying a refined contemporary feeling. Our current signature will remain visible for a while on the Ideal Standard collections until it is progressively replaced by the new logo. You can rest assured that our brand and products will more than ever facilitate and enhance your life.

Melange

A harmony
of understated elegance

Minimalist but sensual, Melange's beautifully curved form adds character to your bathroom without dominating. Available in a range of options, its sleek, geometric shape perfectly complements the rounded edges of any basin, bath or bidet. Ultra-smooth to the touch and a dream to operate, Melange is a must for any bathroom of style.

Design by

Artefakt industriekultur was founded in 1989 by Thomas Fiegl and Achim Pohl in cooperation with the international industry. The design team, with up to 12 designers, develops product lines within the overall development process.

New era of bathroom design

An entire range of fittings to suit each section of the bathroom means the perfect synthesis of strong, fluid lines. No matter what your taste or existing bathroom, Melange is infinitely adaptable. A large variety of installation options are available to suit your beauty pampering, bathing and showering spaces, giving you the freedom to choose the model that's perfect for you.

Single lever basin mixer

Exposed bath and shower thermostat

Single lever bath and shower

Built-in shower mixer

The beauty of saving water

Save precious water while adding a touch of streamlined elegance to your bathroom. Each equipped with a clever water-saving device, four options provide the ultimate complement to your beauty pampering area. Whatever your taste, whatever your environment, Melange adapts to any basin with effortless grace while being thoughtfully economical. Beautiful and smart...

functionality

As good-looking as it is practical, this basin mixer has an integrated aerator for greater functionality and ease-of-use while adding a classic but contemporary touch to your bathroom.

The vessel basin mixer

with its superb body and smooth side handle provides the perfect complement to any vessel. Simple but dynamic design results in an impressive balance of line and form. To avoid lime scale build-up and any interruption of Melange's smooth, curved line, an integrated aerator means no visible aerator and easier cleaning.

Single Lever basin mixer

Those who enjoy minimalist design but sometimes find it too austere will love this basin mixer. The perfect illustration of artful modesty, its smooth lever is simple to operate for easy control of water flow and less waste.

The stylish basin mixer

With its fine, fluid form adds character to your bathroom environment while limiting water wastage. Safe and easy, Click technology gives you a water saving device to help you control how much water you use. When you raise the handle, a point of slight resistance indicates when the fitting is delivering half its maximum flow. You can be sure to take pleasure in comfortable temperature control at any time.

Essentially excellent performance

The Melange thermostatic wall mounted shower and shower&bath mixer means unlimited pleasure... Warm water flows at your favourite temperature to revive and indulge your body without making you wait. Plus, with technical innovation such as the ingenious Cool Body, peace of mind and optimal ease-of-use are guaranteed. Practical, clever thinking ensures you receive ultimate performance and ultimate satisfaction.

Revel in a shower experience with no threat of cold shocks or scalding surprises.

Thermostatic temperature control and flow limiting with an override button ensures maximum safety and enjoyment. An automatic push-and-pull diverter, three-function handspray and invisible fixation nuts and escutcheons mean easy operation and a streamlined look.

functionality

Thermostatic shower fittings - Total safety

This clever thermostat ensures water temperature is maintained for maximum comfort while the ingenious Cool Body innovation means the fitting is safe to touch. So you and your children are always protected regardless of water usage in other parts of the home.

Built-in Thermostatic

This model also offers an abundance of comfort and safety. Dual controls comprise a temperature handle with built-in safety stop at 40°C and a flow-control handle with ceramic disc technology for a smooth turning action.

Simple appearance, superior technology

Behind the studied simplicity of the manual bath and shower fittings lies a world of state-of-the-art technology. Designed for long-lasting reliability and durability, advanced research ensures precise performance for absolute enjoyment. Top-quality materials and workmanship come together to create a masterpiece of practicality for your pleasure and peace of mind.

innovation

An innovative push-and-pull diverter makes changing from shower to bath child's play. Integrated into the body of the shower design, it is unassuming and elegant. Not only that, multi-port ceramic disc technology controls water flow and temperature with impeccable precision on the one hole bath fitting.

innovation

A reference point in bathroom innovation. Superfluous details were eliminated in the creation of this mixer, resulting in only the purest, most essential lines. The end of the shower hose fits seamlessly into the soap holder for invisible transitions and fixation nuts and escutcheons are unseen as they are sealed to the wall. With water saving technology, this is simple, timeless quality and style.

The built-in mixer is easy to install, takes up very little room and offers maximum enjoyment. It is also incredibly easy to clean as there are no visible fixing screws with the durability of an attractive metal handle and escutcheons.

Melange product review

Melange basin SL mixer 1-hole PUW tubes chrome

A 4258 AA
Cu-tubes D10 M8X1
35 mm cartridge KEROX with hot water limit stop
