Sundeck

Here. There. Everywhere.

In the bathroom. In the living room. On the patio... Sundeck, the latest new bathtub from Duravit, is a stroke of genius in all senses and in all surroundings. The distinctly stylish look cuts a dashing figure anywhere in the home where there is a hot water connection. A practical cover keeps the fragrant bathwater warm until you climb in. And that's not all: folded back, it provides the bather with a comfortable headrest, folded out it becomes a relaxation deck and shelf area. And despite all the practical functionality, Sundeck always looks like an elegant item of furniture. That, too, is wellbeing – for all the senses.

Versatile: the cover, folded back as a headrest and closed with an additional neckrest. **Comfortable:** the remote control for coloured light, etc. and the upholstered step that facilitates access. **Splendid:** the new tarpaulin for outside.

— Sundeck built-in version, 1900 x 900 mm —

Sundeck is also available in three practical built-in models, as single- or two-seater version (190 cm) and as XL two-seater (210 cm).
